

Information Technology Trends

Ahmed Ramadan

18/07/2022

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

Trends

- Docker is the most common use platform
- The use of Python will increase 15 % next year
- Top 3 used databases will all be NoSQL databases in the following year

Demographics

- 11211 respondents
 - 93.5% men
 - 6.5% women
- 8477 (75.6%) respondents are at the age between 21 to 35

INTRODUCTION

- Analyze technology trend in software and web development among developers around the world

Purpose of this Analysis

- Identify the top programming languages, database, platform and web frame skills in demand
- Identify skill requirements for future based on the top programming languages, database, platform and web frame in the next year
- Identify human resource gap in the industry

Audience for this Presentation

- Programmers
- IT industry leaders
- Computer science students

METHODOLOGY

Data Collection (Sources)

- Stack overflow developer 2019 survey
- GitHub job postings
- Programming languages annual salary

Data Wrangling using python

Data Exploration using python

Data Visualization using python and IBM Cogns

RESULTS

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Bash/Shell/Power Shell and HTML/CSS are top 2 languages both this year and next year
- Go will be in the fifth rank instead of java
- Users of Bash/Shell/Power Shell and HTML/CSS will decrease by 30% in the following year

Implications

- Go is the new trending language
- Bash/Shell/Power Shell and HTML/CSS still indemand

DATABASE TRENDS

Current Year

Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Microsoft SQL server is the most popular database
- There are still a lot of companies using MySql
- MongoDB and postgresQL are the most favorable NoSQL database

Implications

- Open-source databases like MySQL are still preferable
- Software development and Big Data technology still requires SQL
- NoSQL databases will make an impact for relational databases

DASHBOARD

DISCUSSION

- 
- Technology Usage Trend Now and Future
 - Gender, Age and Education Discrimination in IT Industry

OVERALL FINDINGS & IMPLICATIONS

Findings

- Technology trends changes every year
- There are extreme gender and age discrimination
- Docker and AWS are the most popular platform

Implications

- Programmers should always follow the latest technology trends
- Further research and changes are required to encourage more women to enter the industry

CONCLUSION

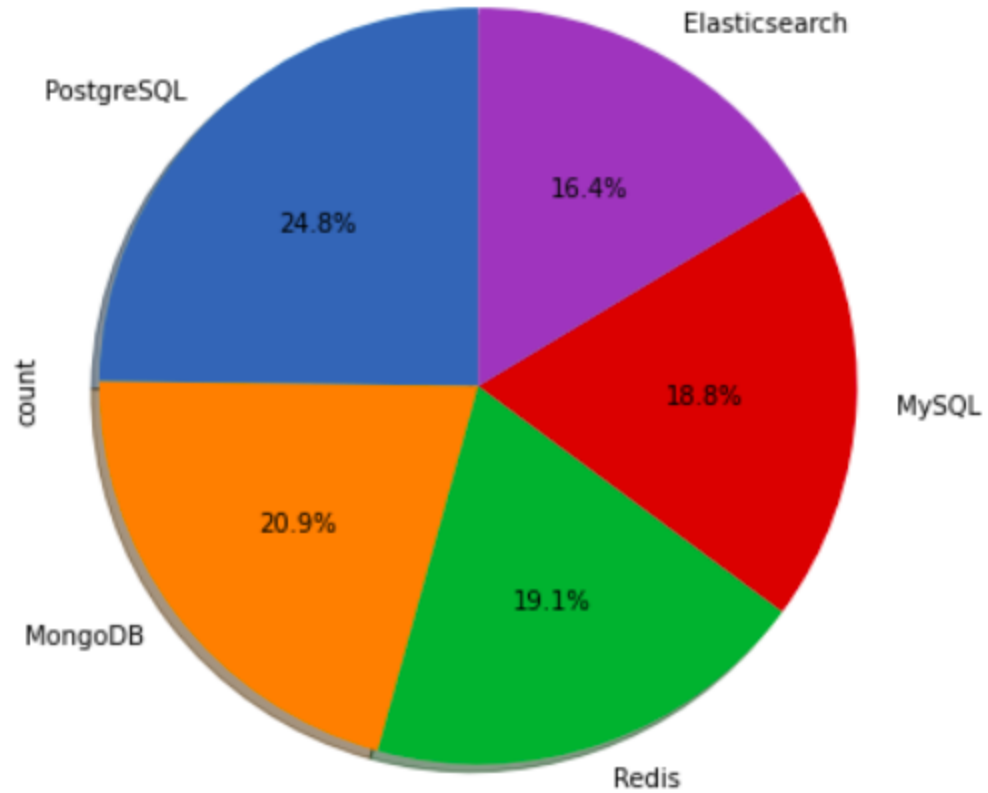

- Flexible platforms and databases can optimise systems, improve the performance and closely meet company needs
- Young generation is willing to join technology industry.
- However, more promotions are needed to women and people from worldwide
